

## Frequently Asked Questions

### Q. How effective is the treatment?

**A.** Very. We appreciate that all our customers are different and will respond in different ways to the treatment, but our methods have been clinically tested, and studies indicate that around 90% of people using our Alpha-Stim® therapy can see a significant improvement in their condition in as little as three weeks.

### Q. How quickly can I expect to see results?

**A.** We would normally expect to see a reduction in pain or stress after one treatment. Improvements in depression, anxiety, insomnia and fibromyalgia symptoms can take longer. All results are cumulative so you should see a gradual improvement over time.

### Q. How often will I need treatment?

**A.** Initially we recommend you visit the clinic once a week and treat yourself on a daily basis, using the probes, pads and ear clips and following the protocols issued by your practitioner.

### Q. Are there any side effects?

**A.** Adverse effects from the treatment are usually mild and self-limiting. The microcurrent treatment is not suitable during pregnancy or for anyone with a pacemaker. Please consult your practitioner if using Alpha-Stim® alongside any medication.

### Q. How much does treatment cost?

**A.** Please consult your practitioner for prices of treatments and machines, machine rental and payment plans may be available on request. V.A.T. exemption may apply.\*

ALPHA-STIM®

Fed up of constant pain and suffering?

We offer a **clinically proven** solution for:

- Depression
- Anxiety
- Insomnia
- Pain
- Stress
- Fibromyalgia
- Arthritis

## Freedom from Pain... of the Body and Mind

Absolutely nothing relieves pain, anxiety, depression, and insomnia like the Alpha-Stim®. Inspired by recent advances in our understanding of biophysics, the Alpha-Stim® therapeutic abilities have been acclaimed by health care professionals and patients worldwide. Results gained from the Alpha-Stim® have been repeatedly verified through more independent studies than with any other device in its class.

In a survey of 2500 Alpha-Stim® clients, self reporting after 3 weeks use of the Alpha-Stim® technology, around 90% reported a significant improvement in their symptoms.

Alpha-Stim® has been used for 30 years and offered 10 million people worldwide a solution with the following key benefits:

- **Safe and easy to use**
- **Quick and highly effective**
- **Suitable for home use**
- **Cost effective**
- **Culmulative results**
- **Unlike some drugs leaves the mind alert**

## A Truly Unique Solution

The Alpha-Stim® uses microcurrent electrical therapy (**MET**) and cranial electrotherapy stimulation (**CES**).

### The Alpha-Stim® - How Does it Work?

**MET** and **CES** work with micro currents, close to the type and amount of electricity that naturally occurs in the body. They produce residual and cumulative results that encourage the body's systems to work better.

### Comparison with TENS

The results from **MET** and **CES** can be superior than traditional TENS devices. The electrical current used by a typical TENS is thousands of times greater than natural body current. Frequently when the TENS is turned off the pain returns. The Alpha-Stim® current is so gentle, you often feel nothing at all except for longer lasting positive results.

### Ease of Use

For the relief of pain, probes or self adhesive electrodes are applied to the body using specific protocols. **CES** treatment is administered via easy to use ear clips, promoting a calm yet alert feeling. Your local practitioner will be able to work out the best protocols for you.

Why not try for yourself? Book in for your first treatment and get the relief you have been looking for.

## Testimonials

**"Plug in and wave goodbye to Pain."**

Patrick Strudwick, The Daily Telegraph - Anxiety.

**"I can't be without it. It's an absolutely amazing machine."**

Karen Willis - Carpal Tunnel Syndrome.
